Fee: **\$30.00**

Site Address: _____ Legal Description: _____
 Owner: _____ Phone: _____
 Daycare Name: _____ Phone: _____
 Mailing Address: _____
 Well location: _____
 Sample Source: _____
 Sample collected by: _____
 Date and time sampled: _____
 Received at Environmental Services Dept: _____ Initials: _____

RESULTS: Check desired tests

NITRATE Date Analyzed: _____ Initials: _____

The MCL (Maximum Contaminant Level) for nitrate-N is 10 parts per million. Nitrate above 10 ppm may cause methemoglobinemia or "blue baby" disease in infants. *Boiling does not remove nitrate.*

PRESENT approximately ____ ppm NOT DETECTED

BACTERIA Date Analyzed: _____ Initials: _____

If marked present, water should be boiled 10 minutes, or bottled water should be used for drinking. The well should be disinfected and any other appropriate maintenance performed.

Coliform	<input type="checkbox"/> PRESENT	<input type="checkbox"/> NOT DETECTED
E.Coli	<input type="checkbox"/> PRESENT	<input type="checkbox"/> NOT DETECTED

ONSITE WELL EVALUATION Date Inspected: _____

- Well head terminated in a pit
- Well not adequately sealed
- Well located within 50' of wastewater system, surface water, or animal pen
- Other _____

It is recommended that your well water supply be tested yearly, especially if there are young children, pregnant women, chronically ill, or elderly consuming the water. **It is recommended that water wells be upgraded to current standards whenever possible.** If you have any questions, please contact the Dickinson County Department of Environmental Services. *Thank you.*
